

**John Deatrick**  
**The Banks Project Executive**

Throughout his 36 year career, John has worked in a broad range of civic improvement projects, including planning, design, and construction. He served for 29 years with the City of Cincinnati the last three years as Director, Department of Transportation and Engineering, 5 years plus as Deputy Director/Chief Engineer of the Government of the District of Columbia, and now Project Executive for Cincinnati's Central Riverfront development project, The Banks. His particular areas of focus include bringing a sustainable approach to his work, including multi-modal transportation, asset management, green highways and mixed-use development. He values positive approaches to deliver social and environmental justice.

A Navy veteran, John has a BS in Civil Engineering from the University of Cincinnati and a BA majoring in Business from the University of Maryland with post graduate work in Art History and Urban Planning and History. He is a licensed Professional Engineer in multiple states, a Certified Planner, a LEED AP, and a Chartered Engineer in the United Kingdom.
